

## Sun Fook Kong Wins MTR Distinguished Awards in Environmental and Safety Performance

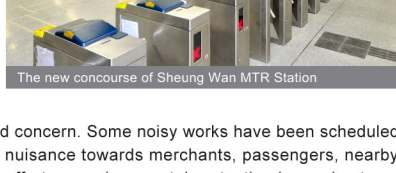

In recognition of its outstanding performance in environmental protection and safety management for the West Island Line Project, Sun Fook Kong has been granted "Gold Environmental Award", "Silver Safety Award" and "Lowest Reportable Accident Frequency Rate Award" by the MTR Corporation Limited. The "West Island Line Contract No. 701 – Modification of Sheung Wan Station" commenced in April, 2010. To transform the Sheung Wan Station from a terminus to an intermediate station, the scope of work includes installation of new rail tracks and overhead power lines, new passenger lifts, enlargement of the East Concourse and improvement works to the station facilities.

The project team of "Modification of Sheung Wan Station" contract

These awards not only give recognition to Sun Fook Kong's outstanding performance in environmental protection and project safety, but also a reflection on partnering and teamworking. Mr. Jimmy Shing, the Senior Project Manager of Sun Fook Kong, said, "Partnering and teamworking are key elements to achieve performance, excellence and success. As we understand that we are working as a team for the same project but not as an individual, the team spirit of unity and close cooperation allows us to overcome the difficulties encountered during the course of the works."

With regard to the environmental protection, Sun Fook Kong has taken relevant measures to manage the air quality, noise, sewage treatment and waste disposal including: adoption of moisture sprayers to prevent dust spreading, monitoring of construction noise level, installation of sedimentation tanks to reduce the generation of waste water and implementation of the waste sorting system. Ms. Marian Kong, the Assistant Environmental Officer, said, "Facing the limited water storage space on site, the main concern in this project is to reduce the amount of sewage discharge.

The new concourse of Sheung Wan MTR Station

And the minimization of noise generation is our second concern. Some noisy works have been scheduled during MTR's non-operation hours to avoid the noise nuisance towards merchants, passengers, nearby residents and pedestrians. We believe our persistent effort on environmental protection has upheld our performance excellence on the overall project quality."

The sedimentation tanks on site

Provision of shoulder racks for workers

Project quality and site safety have always been emphasized in Sun Fook Kong who has established a comprehensive project management system. Mr. Jay Chiu, the Assistant Quality Control Engineer, said, "To ensure the quality of our works, we have to make every effort to manage all relating factors such as site cleanliness, emergency planning, safety monitoring, site environment, risk management, site facilities, conditions of tools and equipments and public safety." Moreover, to reduce the risk of injuries to workers in manual handling operations, the material trolley system has been devised and used to replace human in material transport and shoulder racks have been provided for workers to facilitate their daily work.

A successful project requires good time and cost management, as well as efficient control on quality and safety. As mentioned by Mr. Jimmy Shing, "it's all about teamwork." Driving by partnering and teamworking, Sun Fook Kong has built up a harmonious work environment for its staff and maintained a good relationship with its partners, with an aim to improve the overall performance in a continual manner.

## "Sun Fook Kong Safety Awards Scheme 2012" Officially Launched

Sun Fook Kong has held the opening ceremony of "Sun Fook Kong Safety Awards Scheme 2012" at the hotel Eaton Smart, Hong Kong on 6 January, 2012. Sun Fook Kong has launched the "Sun Fook Kong Safety Awards Scheme" since 2011 to raise the work safety and site cleanliness and to recognize management's efforts in enhancing site safety. A number of senior management staff from the Group has become adjudicators of the scheme, and has visited and assessed the competing sites in person to select the final winners of "The Best Performance Project Safety Award" and

"Good Housekeeping Campaign". "Sun Fook Kong has been actively promoting a safety culture and raising the safety awareness among us. We hope our team spirit will contribute to the fulfillment of safety and "zero accident" in the construction industry," Mr. Patrick Lee said during the opening speech.

It was announced in the ceremony that "MTR West Island Line Project - Modification of Sheung Wan Station" won the championship of "The Best Performance Project Safety Award" of "Sun Fook Kong Safety Awards Scheme 2011"; "Drainage Improvement Project in Northern Hong Kong Island - Western Lower Catchment Works" won the first runner-up; and "Extension Project of Footbridge Network along Tai Ho Road in Tsuen Wan" won the second runner-up.

## Sun Fook Kong is Granted "The Outstanding Corporate Social Responsibility Enterprise Award"

Sun Fook Kong has been granted "The Outstanding Corporate Social Responsibility Enterprise Award" by The Mirror in recognition of its efforts in corporate social responsibility at the Presentation Ceremony held on 17 January 2012 at the Hotel ICON.

Mr. Robin Chan, the Vice President of All-China Federation of Returned Overseas Chinese (Right) and Mr. Yang Guohua, the Strategy Consultant of HKU SPACE (Left) present an award to Mr. Patrick Lee, the Managing Director of the Construction Division of Sun Fook Kong Group (Middle)

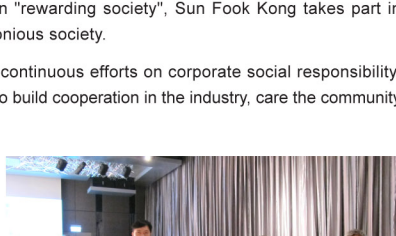

The contests of the 1st Corporate Social Responsibility Award began in August 2011 to promote the social responsibility image and to share experience among enterprises from Mainland China, Taiwan, Hong Kong and Macau. Sun Fook Kong was finally honored the Corporate Social Responsibility Award. The Evaluation Committee was impressed by Sun Fook Kong's goal of sustainable development, value "rewarding society" and efforts on "taking social responsibility" over the past 60 years.

Sun Fook Kong views corporate social responsibility not only in its relationship with different stakeholders such as customers, partners, employees, but also in areas of sustainable development of the society, environment and resources, as well as its commitment to the community. When enterprises review their own development needs, they should contribute to social harmony as well. For more than 60 years, Sun Fook Kong persists on people-oriented and sustainable development by bringing in international environmental standards in the industry and advocating environmental-friendly manufacturing. Sun Fook Kong keeps balance among customer commitment, shareholder commitment, employee care, leadership, environmental protection and social concern. Meanwhile, focusing on "rewarding society", Sun Fook Kong takes part in social welfare activities and donations to build a harmonious society.

This award has given recognition to Sun Fook Kong's continuous efforts on corporate social responsibility. Striving for a better future, Sun Fook Kong will continue to build cooperation in the industry, care the community and contribute to the society.
